Asbestos Removal

Project Name: Royal Marsden Hospital, Sutton.

Project Value: £53,000.00

Project Scope: Removal of asbestos containing floor covering and contaminated sub-floor duct including pipework throughout building.

Project Brief

SCK Group we successful in obtaining the contract to Remove floor coverings throughout the ground floor of Orchard House, Removal of asbestos containing bitumen and floor screed along with excavation of a contaminated sub floor duct including removal of all services within the duct which run through the entire ground floor of Orchard House.

Due to the programme of work set out by our client which the demolition of building was a critical path for the project we accelerated the project with additional resource to bring the completion of the project in a week early to the complete satisfaction of our client.
