Asbestos Removal

Project Name: Epsom Hospital, Surrey
Project Value: £487,000.00
Project Duration: 8 Weeks

Project Brief

SCK Group carried out asbestos removal to 550 metres of service ducts below ground level throughout Epsom Hospital including the removal of all associated service pipework and ancillary plant, the project entailed complex enclosure design and air management to facilitate the removal process which was all carried out under fully controlled conditions within asbestos enclosures.

We also carried out asbestos removal to the main boiler house under fully controlled conditions including decommissioning of the boilers and associated plant with a full de-plant at the end of the project.
