

Case Study

Asbestos Removal

Project Name: Apex Tower

Project Scope: The controlled removal of 1700m² of bitumen adhesive beneath screed to two floor levels and all notifiable asbestos remediation works to various locations

Project Duration: 8 Weeks

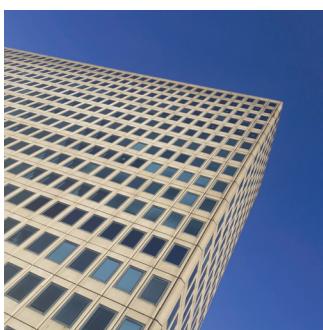

Project Value: £168,000.00

Project Brief

SCK Group were directly appointed to undertake the controlled removal of 1700m² of bitumen adhesive beneath screed to two floor levels all notifiable asbestos remediation works to various locations within Apex Tower and. These works were methodically planned under HSE notification to enable the Principle Contractor to remain within program and with minimum disruption to other operations being conducted on site.

As a constant access was required to the site at all times all ground floor works were undertaken within an SCK purpose built site hoarding and structure to form an exclusive segregation from the building occupants and other contractors on site. This proved an effective and robust solution for partial external working

All asbestos works were completed in a timely manner with weekly site progression meetings held on site within the Principle Contractors along side regular unannounced attendance on site by the Contracts Director and Health & Safety Director.
