Demolition

Project Name: Great Ormond Street Hospital, London

Project Scope: Nuffield Wing, full strip of walls and ceilings working around live wards and associated services.

Project Brief

SCK Demolition were successful in being awarded the full strip out of the Nuffield Ward at Great Ormond Street Hospital.

The hospital was fully operational throughout the project and the adjoining wards were all live with patients and staff whilst our works were carried out. Careful planning was fundamental in delivering this project as live medical gases were situated within the walls and ceilings that were being demolished.

This entire project was carried out using only hand held tools to ensure that no services were disrupted due to the critical nature of the occupants in the adjoining wards. All demolition waste was removed through the building at strictly set times ,within bespoke fully sealed waste bins, which were escorted to the allocated loading area at the front of the building where our haulage collected daily on a wait and load basis.
