

Case Study

Asbestos Removal

Project Name: Grosvenor Gardens House, London, SW1W 0BS

Project Value: £386,000.00

Project Duration: 4 months

Project Description: Asbestos Removal and Soft Strip

Project Brief

This mid-Victorian French Renaissance style mansion block was built in the mid-1800s, Grosvenor Gardens House is a grade II-listed building situated in Belgravia. SCK Group previously conducted controlled and innovative Pigeon Guano removal, soft stripping works, asbestos removal throughout the entirety of the building without compromising the historic value of the structure and accounting for the future restoration of the existing fabric and features.

Due to the location of the building, waste movements and working times had strict timings where forward planning and initiative were implemented to ensure that this very high profile project could be completed on time for the critical path of structural demolition to take place to ensure the smooth progression of this project.
